

WHO ARE WE?

Since 2003 WTSS has been a trustworthy solid partner for top European banks by providing real-time insights and verification of the complete end-to-end financial transaction chain and their business processes.

By running and monitoring sample flows 24/7, processing issues are identified and can be promptly attended to by operational staff at an early stage. Well before end-customers might become aware of any deviations or critical issues.

We duplicate these international money transactions from an end-customer's perspective by actually transferring money between actual accounts in multiple countries.

WTSS' platform is tailored to the bank's needs and integrates with SWIFT, web or other communication channels.

SERVICES

- Consultancy
- End-to-end testing
- Business verifications
- Business application monitoring

WTSS' PLATFORM

REAL TIME INSIGHT AND VERIFICATION

We provide European and international banks with real-time insights and verification of the complete end-to-end financial transaction chain.

Processing issues are identified and can be promptly attended to by your operational staff at an early stage. Well before your customers might become aware of any deviations or critical issues.

- Verification from your customers' perspective
- External verifications (outside of your network)
- 24/7 monitoring and reporting
- Tailor made solutions
- No financial risks
- No responsibilities
- No auditing and risk issues
- No complex procedures or time-consuming paperwork
- No need to plan or reserve timeslots

TOP EUROPEAN BANKS HAVE ALREADY PUT THEIR TRUST IN OUR SERVICES

SIGNIFICANTLY REDUCE YOUR PROCESSING CHALLENGES

In this volatile market banks are facing new operational challenges. Now, even more than ever, it is essential that banks are a reliable partner. In the maze of international money transfers and related products, banks need to be able to guarantee their customers' assets are truly transferred according to their SLA's. There simply is no room for failure.

Our integrated platform provides your bank with a head start by identifying any processing issues early on and mitigates any risks or auditing issues that can be raised by your customers.

24/7 MONITORING

REPORTING & ALERTS

STAY AHEAD OF ANY CRITICAL ISSUES

We run and monitor sample flows 24/7 of the complete end-to-end financial transaction chain of your customers:

By acting as an actual customer of your bank, we duplicate international money transfer flows of your customers. We set up actual international accounts and transfer our own funds between those accounts.

In other words, each step of an international financial transaction of your customer is actually monitored across different countries and different banks in order to identify any processing issues early on, well before your customers do.

24/7 PROCESS MONITORING

In addition, these financial transaction flows are monitored 24/7 by our own platform and our highly qualified and screened staff.

REPORTING AND ALERTS

Identified deviations or critical issues are presented real-time on an intuitive management dashboard and are promptly reported back to your operational staff by E-mail or SMS alerts.

CUSTOM MADE PLATFORM

Our services are tailor made to your bank's requirements by incorporating complex operational standards (SLA's) and integrate with SWIFT, web or other communication channels.
